

The Leading Korean Plastic Surgery Provider Enters the Los Angeles Market

Rated “Best in the World”, Dream Plastic Surgery Clinic has performed successful surgeries on many entertainers and has just put out its shingle in Mid-Wilshire

Dream Plastic Surgery Clinic considers their best work to be those procedures that satisfy clients.

“We always try to help our clients achieve their dreams and it is our dream to be completely client focused. This is why we call ourselves, “Dream”.

Dream Plastic Surgery, which is a top medical group in South Korea, held a grand opening ceremony on January 25th to celebrate the establishment of its first clinic in the United States. President Dr. Hong-sik Song was present to kick things off.

Korea is regarded as the top provider in the world in the field of plastic surgery thanks to the nation’s state-of-the-art equipment and technology.

Now, the LA branch of Dream Plastic Surgery Clinic is showcasing the [See Dream A6]

work of Korea to patients Los Angeles and beyond.

In fact, Dream Plastic Surgery Clinic was the first of its kind in Korea and its business group directly manages large beauty clinics not only in various parts of Seoul, but also in Shanghai, China. The clinic is famous for customizing surgery methods and techniques to each client and is well-known in Korea for performing plastic surgeries on entertainers.

The medical staff of the clinic is made up of graduates of Seoul National University Medical School and the clinic’s brand is well-respected, thus making Dream the true clinic of choice for patients around

the world in the markets where it is active.

Dream Medical Group is the umbrella organization that oversees Dream Plastic Surgery Clinic, Dream Dermatology, Dream Dental and other medical clinics. The group provides its clients with the most beautiful faces through aesthetics-centered medical services.

Dream Plastic Surgery Clinic plans to attract clients in the United States through a partnership with Dr. Kenneth Kim, a plastic surgeon who graduated from UC Berkeley with a BS in molecular cytology (summa cum laude) and who studied at Yale University Medical School for four years with a full schol-

arship. Going back and forth between the United States and Dream Plastic Surgery Clinic in Korea for the past five to six years, Dr. Kim has learned the techniques to best meet client needs. As director of Dream’s first branch clinic in the United States, Dr. Lee plans to introduce the know-how which he has acquired over the years.

President Hong-sik Song of Dream Plastic Surgery Clinic explains, “We will provide world-class plastic surgery results that are most appropriate for clients. The combination of the meticulous hands for which Koreans are known and American high-technology will become popular not only with ethnic

Koreans but also other demographic groups in the United States. Clients in the United States will be able to experience our clinic’s specialized plastic surgery procedures, such as double-eyelid surgery (buried suture technique), lateral canthotomy, minimally invasive epicanthoplasty surgery, and rhinoplasty (correction of a snub nose).”

Dr. Kenneth Kim shares, “Plastic surgery is an area which requires a profound understanding of the skin and face, as well as excellent medical technique. Even now, there are many cases in which Asians head to South Korea to have plastic surgery. I have heard that many of these people are having difficulty because they cannot receive touch-up or find-up services after surgery. Dream Plastic Surgery Clinic will provide the highest level of satisfaction to clients through perfect surgery results and rigorous after-surgery care.
